Functional pharmacology: the drug discovery bottleneck ... Functional pharmacology, especially in vivo, is the integrating driver for drug discovery. It needs to be sustained, and given the same credibility in research settings as that already given to reductionism. Extrasynaptic GABAA receptors: Form, Pharmacology and Function Biophysical properties of recombinant  $\alpha 1$  subunit-containing GABA A R channels (R.L.M.). Molecular biological and biochemical techniques have been instrumental in determining the basic properties of ligand-gated ion channels, and by inference, the functional properties of native receptors in the CNS.
